ABOUT ME

I'm a dedicated and self-motivated computer science undergraduate student." What goes around comes around " That's what I always believe. I am a hardworking, honest person and it is my nature to always learn new things and implement them. I will break through the upcoming obstacles and open new paths for them. And always I am friendly with others. I have one goal and my talent is to come up with creative projects.

PERSONAL PROJECTS

Easy-Car-rent-system

My Role - Total Contribution

Technical Stack - [React](#), [JavaScript](#), [Spring Boot](#)

- This project's objective is to make a system for a car rental place. A car rental owner wants to change their system online. He expects a software solution for that. Therefore, this project demonstrates how to do that task. The owner can manage everything in this system

Live Chat APP

My Role - Total Contribution

Technical Stack - [Java](#), [Java Socket](#), [Java FX](#)

- This project's objective is to make a simple group chat app using a Javасocket. The chat app has two parts: client and server. It has features like sending images and emojis. I used Java, JavaFX, and Java Socket for this project.

Pos System

My Role - Total Contribution

Technical Stack - [Bootstrap](#), [HTML](#), [CSS](#)

- This project's objective is to make a Standalone POS system for supermarkets. Using this System Cashier can manage customers and Orders. admin has full access to the system. it helps to do daily Business smoothly and correctly

Student-Registration-System

My Role - Total Contribution

Technical Stack - [MVC](#), [Java](#), [Jasper Report](#), [My SQL](#), [Java FX](#)

- This project's objective is to make a Student management system for the Private Education Institute. that system can register new Students, Add New Courses, and display all details of students and their courses it helps to manage the Institute smoothly and correctly
